

Single-sided LED Poster Frames

Our single-sided LED poster frames are stylish, bright and ultra slim.

[Product Brochure](#)

Key Features

- Contemporary design
- Slim frames of 7mm, 9mm and 11mm
- High luminosity rating up to 5000 LUX
- Available in A-Series sized LED-lit frames
- Supplied with a two year warranty

Designed for internal use, LED poster cases feature silver or black frame options and are supplied with a two year warranty.

An innovative construction provides convenience to effortlessly slide poster graphics into the frames, offering a quick and easy solution to continually refresh displays.

VM Two Clip

The minimalistic black border and curved corner design of this LED poster frame complements and enhances displayed poster graphics. With a slim depth of just 9mm, the frame is available in A4 and A3 sizes in portrait and landscape orientations. The magnetic opening enables displayed graphics and advertising messages to be easily updated as often as required.

Compatible fixing/mounting solutions: Wall Mounted Display System (vertical and horizontal displays), VM Box and VM Mobile Stand Easy Clip

VM Super Light

Featuring an 11mm depth and sleek silver border, the VM Super Light poster frame creates a contemporary look with the added bonus of being compatible with a large number of our display solutions. The frame is suitable for use with our portable display stands VM Box and VM Mobile Stand Easy Clip as well as our wall mounting system, where a maximum of five frames can be displayed. VM Super Light is available in an A4 landscape orientation only.

Compatible fixing/mounting solutions: Wall Mounted Display System (vertical displays only), VM Box and VM Mobile Stand Easy Clip

Wall Format I Max

The deep black border and extremely slim 7mm depth offers a neat and modern LED illuminated poster frame. The frames are available in A4 to A0 sizes and can all be displayed in portrait or landscape orientations. The frames are identical in look to the double-sided I Max poster frames, meaning the two frames can be used together to create uniform installations.

Compatible fixing/mounting solutions: Wall mounted with picture hooks
